MOHAMED MOSTAFA

Full-Stack Web Developer (.NET & React) | Building Scalable Web Applications & Digital Solutions

Cairo, Egypt | Phone: +20 1080281048 | Email: MohamedMostafa_1652006@outlook.com

Portfolio: https://mohamedmostafa.dev | GitHub: https://github.com/Mohamedmostafa110 | LinkedIn: https://www.linkedin.com/in/mohamed-mostafa00

PROFESSIONAL SUMMARY

Full-Stack Web Developer and Computer Science student building end-to-end web and desktop applications using React, C#, ASP.NET Core, and SQL Server. Experienced in developing responsive, multilingual (RTL/LTR) user interfaces, state-driven e-commerce workflows, Firebase Authentication integration, and RESTful API consumption. Currently advancing full-stack engineering capabilities through the Digital Egypt Pioneers Initiative (DEPI) .NET track, with a strong focus on clean architecture, maintainable code, unit testing, and relational database design.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript (ES6+), TypeScript, C++, SQL

Frontend Development: React 18, React Router 6, Context API, HTML5, CSS3, Tailwind CSS 4, Bootstrap 5, Vite 6, i18next / react-i18next, Responsive Web Design, Figma Implementation, Accessibility (Semantic HTML, ARIA, RTL Support)

Backend & Desktop: .NET, ASP.NET Core, ASP.NET Core Web API, ASP.NET Core MVC, Windows Forms, RESTful APIs, Object-Oriented Programming (OOP)

Databases & Storage: SQL Server, PostgreSQL, Relational Database Design, Firebase Authentication, Browser localStorage

Tools & Engineering Practices: Git, GitHub, Vercel, Docker (Basics), Unit Testing, Functional Documentation, Prompt Engineering, Data Structures & Algorithms, File Processing, Visual Studio, VS Code

TECHNICAL PROJECTS

Exclusive — Multilingual E-Commerce Platform | *ElMadrasah Graduation Project* **React 18, Vite 6, Tailwind CSS 4, Firebase**

Live Demo: https://e-commerce-website-almdrasa.vercel.app/ | GitHub: https://github.com/Mohamedmostafa110/-E-Commerce-Website-Almdrasa

- Built and deployed a responsive e-commerce storefront (supporting viewports from 320px upward) using React 18, Vite 6, and Tailwind CSS 4, faithfully implementing the Exclusive Figma design.
- Developed end-to-end shopping workflows including product search, category filtering, flash-sale countdowns, cart quantity management, coupon validation, wishlist with move-all-to-bag actions, checkout form validation, order history, and customer reviews.
- Engineered multilingual UI support across English, Arabic (full RTL layout), and French using i18next and react-i18next with persistent language selection.
- Integrated Firebase Authentication with environment-driven configuration and a local-browser fallback, persisted client state via React Context and localStorage, and implemented semantic landmarks, keyboard focus, reduced-motion support, and aria-live notifications.

FitPro — Fitness & Workout Tracking Application | *ITI React Graduation Project* **React, Vite, Bootstrap 5, Axios, Recharts**

- Built a multi-page fitness web application ("Train. Track. Transform.") using React and React Router for browsing exercises, building custom workout routines, and tracking fitness progress.
- Integrated the ExerciseDB API through Axios with a dedicated service layer, Context API for shared state management, and Recharts for interactive progress visualization.
- Implemented localStorage persistence for favorite exercises, custom workouts, progress logs, and dark/light theme switching; validated workflow usability across four days of real workout sessions.

Zad Almarefa — Islamic Educational Platform | *Team Project (Front-End, UI & Architecture Lead)* **HTML5, CSS3, JavaScript, PWA, Capacitor**

- Led front-end development, UI design, and client-side architecture for a multi-page Arabic (RTL) educational platform covering a digital library, exams, Quran sciences, events, and certificates.
- Structured reusable page templates with URL-parameter routing and modular per-feature data files, exploring Progressive Web App (PWA) and Capacitor capabilities for cross-device access.

Task Manager System | *File Processing Course Project* **C#, Windows Forms, OOP, File I/O**

- Developed a desktop task manager in C# and Windows Forms supporting full CRUD operations, completion status tracking, task prioritization, search, and multi-criteria filtering.

- Applied Object-Oriented Programming (OOP) principles and structured file processing to save and reload user data reliably.

ESP32 Wi-Fi Robot Car & Web Controller | *Embedded Systems Team Project* **C++, ESP32, HTML, CSS, JavaScript**

- Programmed an ESP32 microcontroller in C++, configured it as a Wi-Fi access point, and built the browser-based control interface to integrate hardware control with a responsive web UI.

PROFESSIONAL DEVELOPMENT & TRAINING

Full-Stack .NET Web Developer Track | *Digital Egypt Pioneers Initiative (DEPI)* **In Progress (Expected Feb 2027)**

- Completing intensive training in C#, SQL Server, .NET Core Web API, ASP.NET Core MVC, HTML/CSS/JS, Git/GitHub, unit testing, Docker basics, functional documentation, and prompt engineering, alongside soft-skills training and an N-Tier ASP.NET Core capstone project (Lumora Learning Platform).

Web Development Diploma | *ElMadrasah (Almdrasa)* **Completed (Oct 2026)**

- Completed comprehensive web development training in HTML/CSS, JavaScript, TypeScript, and React; delivered the Exclusive multilingual e-commerce application as the graduation project.

Web Development Using React | *Information Technology Institute (ITI) — Summer Training* **Completed**

- Completed hands-on front-end training in React component architecture, routing, state management, and REST API integration; delivered FitPro as the graduation project.

EDUCATION

Bachelor of Computer Science | *El Shorouk Academy — Faculty of Computers and Information, Cairo, Egypt* **Expected June 2028**

- GPA: 3.45 / 4.00 | Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming (OOP), File Processing, Web Programming, Database Systems.

LANGUAGES

Arabic: Native | **English:** Intermediate
